# SauceDemo Manual QA: Bug Report

| | |
|---|---|
| **Application** | SauceDemo, https://www.saucedemo.com/ |
| **Tester** | Venkata Rishit Gurram |
| **Test date** | 07 November 2026 |
| **Operating system** | Windows 11 |
| **Browser and version** | Google Chrome 156.0.8078.80 |
| **Device** | Desktop / PC |
| **Password for all accounts** | secret_sauce |

## Bug Summary

| Bug ID | Title | Account(s) | Severity | Priority |
|---|---|---|---|---|
| BUG-001 | Invalid product ID: cart badge increases but item is not in cart | standard_user, problem_user, performance_glitch_user, error_user, visual_user | Medium | High |
| BUG-002 | Checkout overview page can be opened by direct URL, skipping the information step | standard_user | High | High |
| BUG-003 | Add to cart does nothing for Bolt T-Shirt, Fleece Jacket and Test.allTheThings() T-Shirt (Red) | problem_user, error_user | High | High |
| BUG-004 | Remove button on the inventory page does not remove the item from the cart | problem_user, error_user | Medium | Medium |
| BUG-005 | Finish button on checkout overview throws a JavaScript TypeError | error_user | High | High |
| BUG-006 | Last Name field in checkout rejects input | problem_user, error_user | Medium | High |
| BUG-007 | Product sorting does not work | error_user, problem_user | Medium | Medium |
| BUG-008 | Same dog image shown for every product | problem_user | Medium | Medium |
| BUG-009 | Login and page loads are much slower | performance_glitch_user | Medium | Medium |
| BUG-010 | Product prices change on every inventory page reload | visual_user | Medium | High |
| BUG-011 | Misplaced UI elements on inventory and cart pages | visual_user | Medium | Medium |

# BUG-001: Invalid product ID: cart badge increases but item is not in cart

| | |
|---|---|
| **Account(s) affected** | standard_user, problem_user, performance_glitch_user, error_user, visual_user |
| **Module** | Product Details / Shopping Cart |
| **Preconditions** | User is logged in and can open a product details page. |
| **Severity** | Medium |
| **Priority** | High |
| **Reproducibility (e.g. 3 of 3)** | Reproduced with multiple product IDs greater than 5. |
| **Status** | Open |

## Steps to Reproduce

Step 1- Login to any acc with the credentials given in the home page
Step 2- Once you login open any product
Step 3- At the end of the url change product id to any number greater than 5
Step 4- You will be redirected to another page where you could add an invalid product to cart but it doesn’t appear in the cart and also increases the number of items on cart

## Expected Result

When we try searching for a product id out of the range. It should show invalid and redirect back to home page.

## Actual Result

It gives me an option to add an invalid item to cart

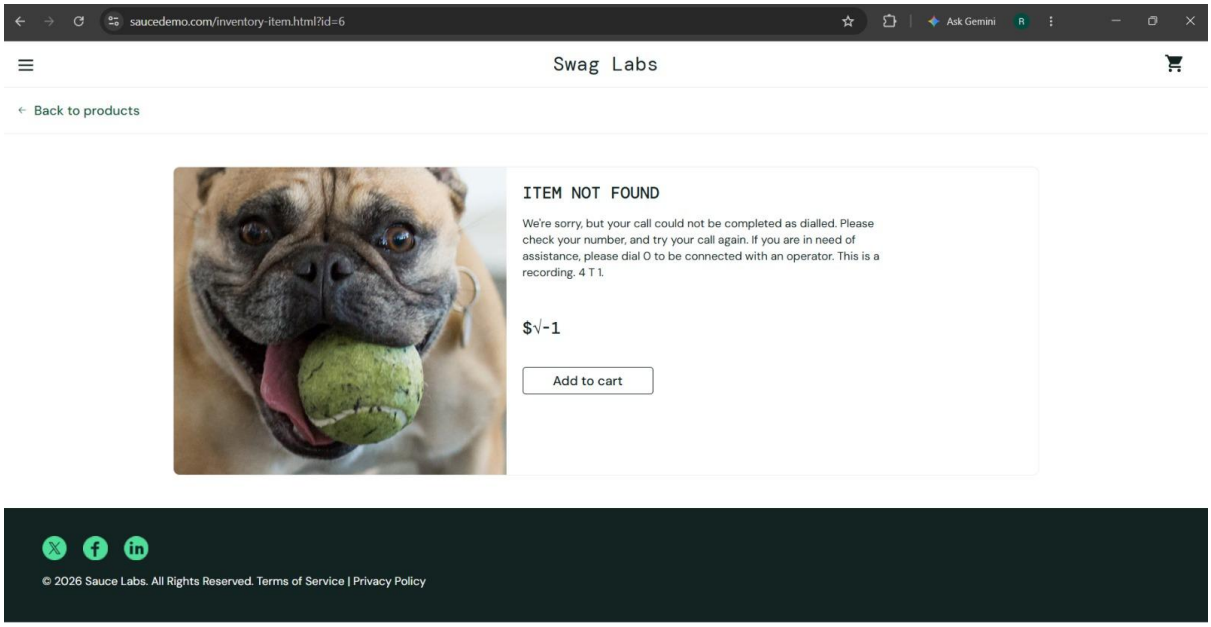

## Impact

The cart badge can show an item count that does not match the actual cart contents.

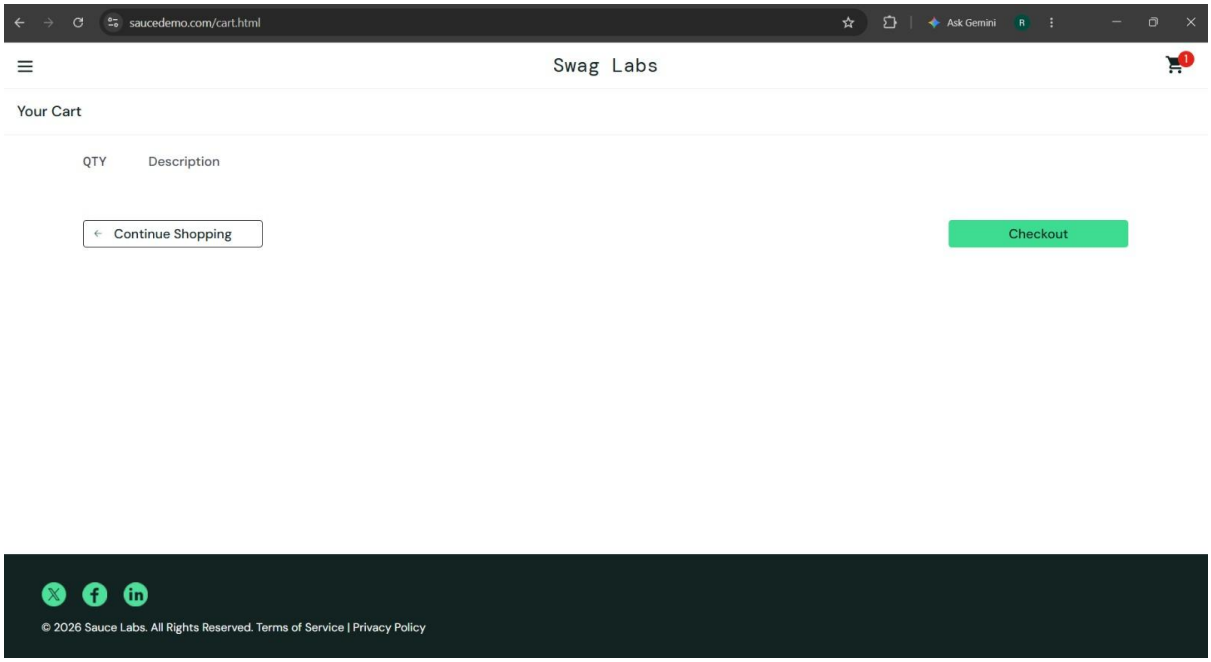

## Notes

The invalid product page displays ITEM NOT FOUND and an invalid price. After Add to Cart is clicked, the cart badge increases, but the invalid product is not shown in the cart.

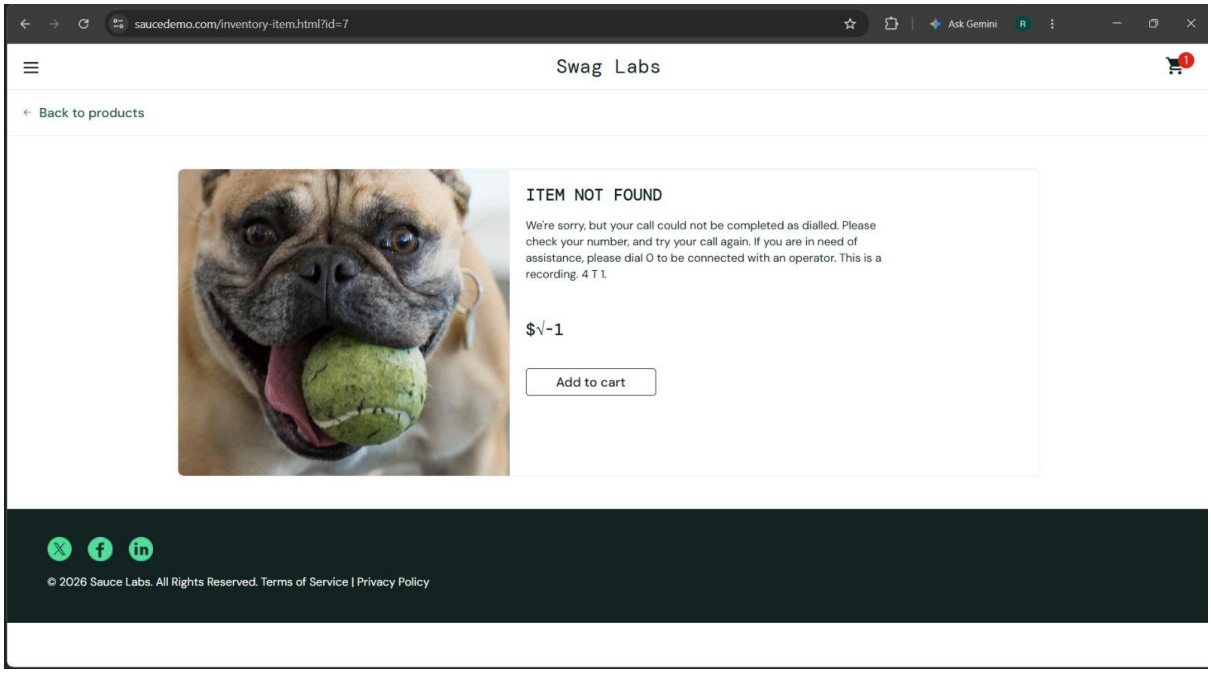

## Evidence

This image shows what happens when product id is greater than 5 in the screenshot is 6

This image shows the cart badge as 1 but has no items in the cart

Another image with product id=7

# BUG-002: Checkout overview page can be opened by direct URL, skipping the information step

| | |
|---|---|
| **Account(s) affected** | standard_user, problem_user, performance_glitch_user, error_user, visual_user |
| **Module** | Checkout / Navigation |
| **Preconditions** | User is logged in and can access the checkout pages. |
| **Severity** | Medium |
| **Priority** | High |
| **Reproducibility (e.g. 3 of 3)** | Reproduced. |
| **Status** | Open |

## Steps to Reproduce

Step 1 - Login to any of the affected accounts
Step 2 – Add products to cart
Step 3 – Start checkout procedure and you will be redirected to https://www.saucedemo.com/checkout-step-one.html this url
Step 4 – Just change **Step-one** to **Step-two** and you will bypass the filling name section

## Expected Result

It should not allow bypass of information filling page

## Actual Result

Bypass was successful and order was also placed

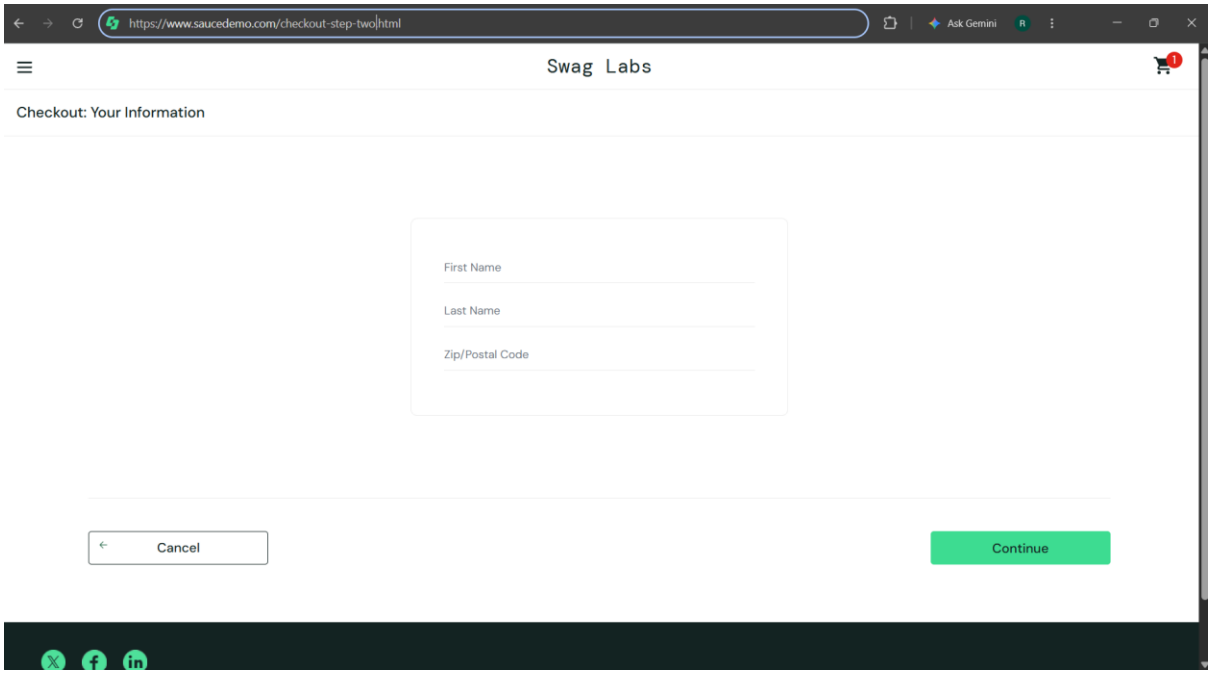

## Impact

A user can reach the checkout overview without first completing the customer information step.

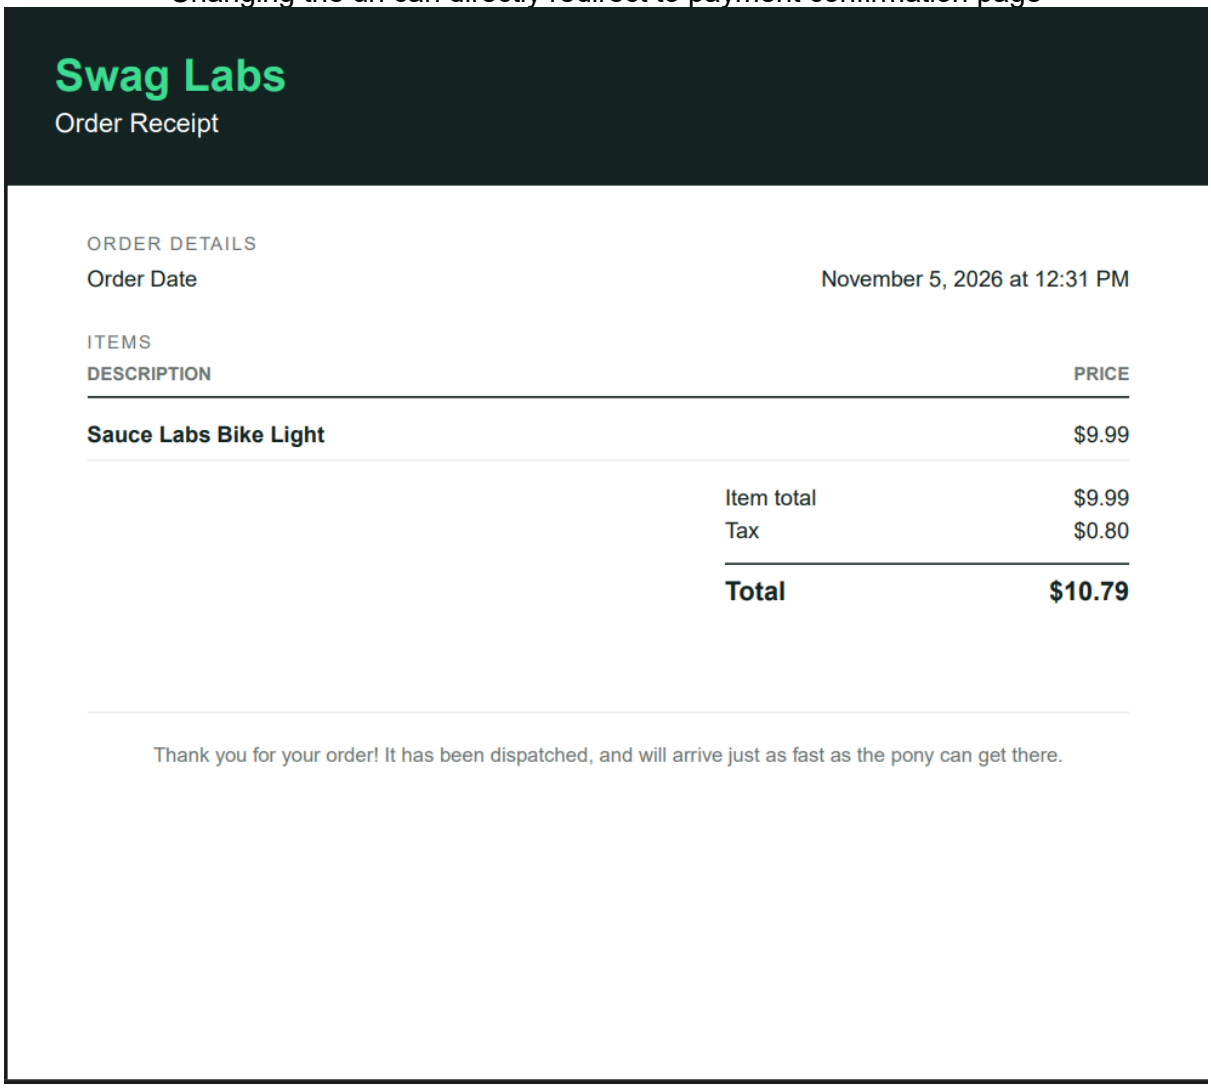

## Notes

The checkout overview page loads when its URL is opened directly.

## Evidence

Changing the url can directly redirect to payment confirmation page

Proof that order has been placed

# BUG-003: Add to cart does nothing for Bolt T-Shirt, Fleece Jacket and Test.allTheThings() T-Shirt (Red)

| | |
|---|---|
| **Account(s) affected** | problem_user, error_user |
| **Module** | Product Inventory / Shopping Cart |
| **Preconditions** | User is logged in and the affected products are displayed in the inventory. |
| **Severity** | High |
| **Priority** | High |
| **Reproducibility (e.g. 3 of 3)** | Reproduced. |
| **Status** | Open |

## Steps to Reproduce

Step 1 – Either login to problem user acc or error user acc
Step 2 – Try adding the all products to cart
Step 3 – You will observe that you can add only 3 products to the cart

## Expected Result

In every account users should be able to add all items and different quantity of items

## Actual Result

Only able to add 3 items out of 6 products displayed

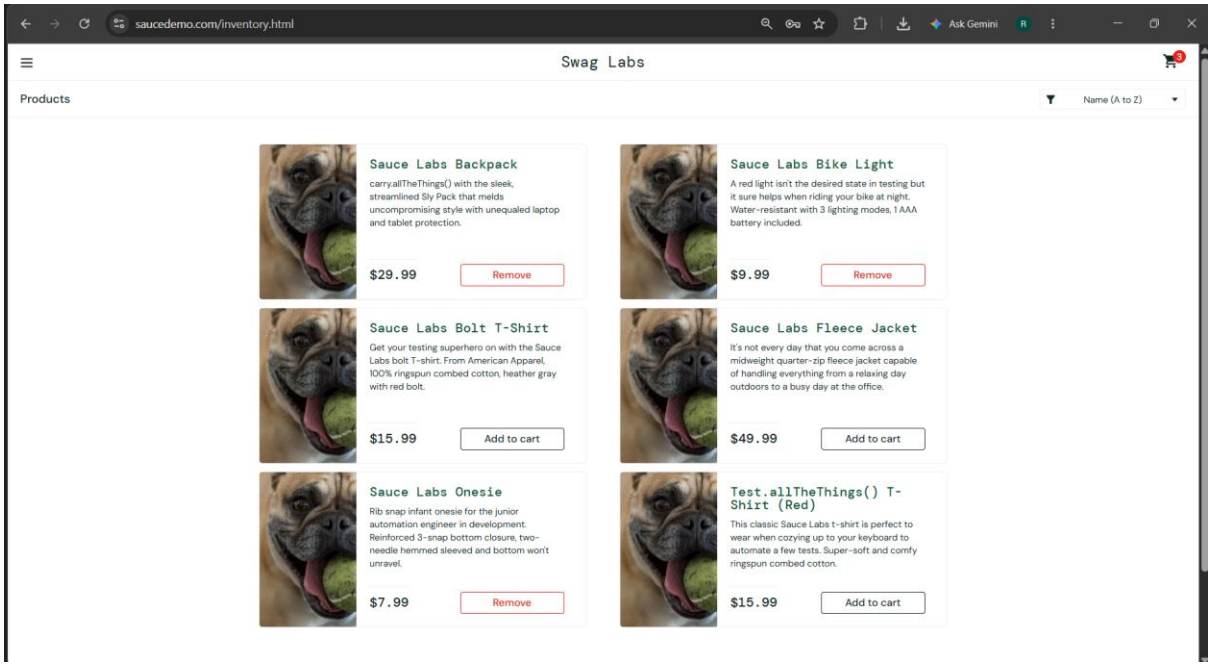

## Impact

Users may be unable to add the affected products to the cart.

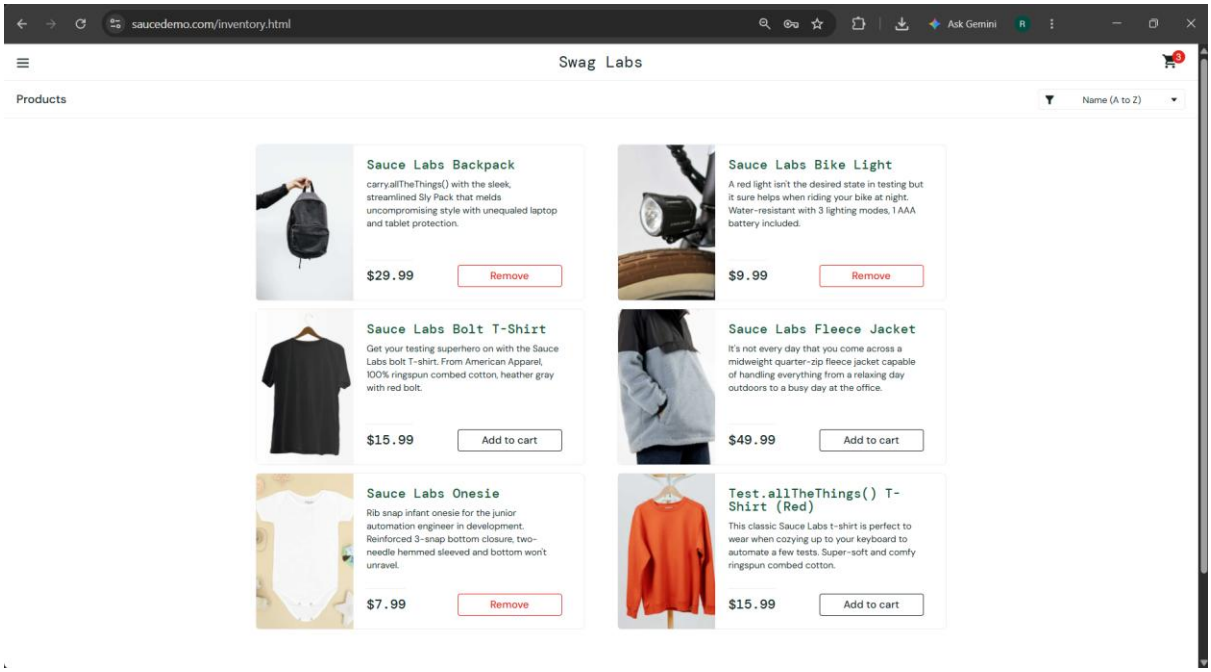

## Notes

The affected products are Bolt T-Shirt, Fleece Jacket, and Test.allTheThings() T-Shirt (Red).

## Evidence

Unable to add the remaining products to cart in problem users

Unable to add the following items in error user

# BUG-004: Remove button on the inventory page does not remove the item from the cart

| | |
|---|---|
| **Account(s) affected** | problem_user, error_user |
| **Module** | Product Inventory / Shopping Cart |
| **Preconditions** | User is logged in and has at least one product in the cart. |
| **Severity** | Medium |
| **Priority** | Medium |
| **Reproducibility (e.g. 3 of 3)** | Reproduced. |
| **Status** | Open |

## Steps to Reproduce

Step 1 – Login to either of the affected accounts
Step 2 – Add any product to cart
Step 3 – Try removing the product from cart without accessing the cart

## Expected Result

The remove button should work and item should be removed from cart

## Actual Result

The button is not working and one cannot remove an item directly from inventory page itself

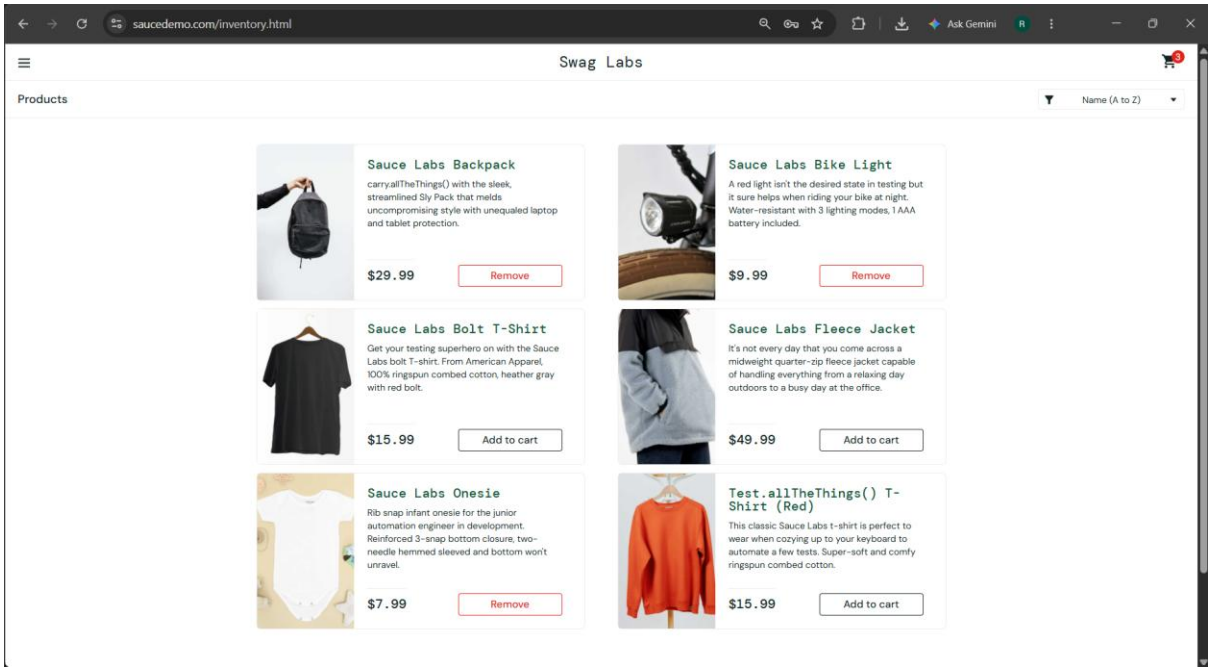

## Impact

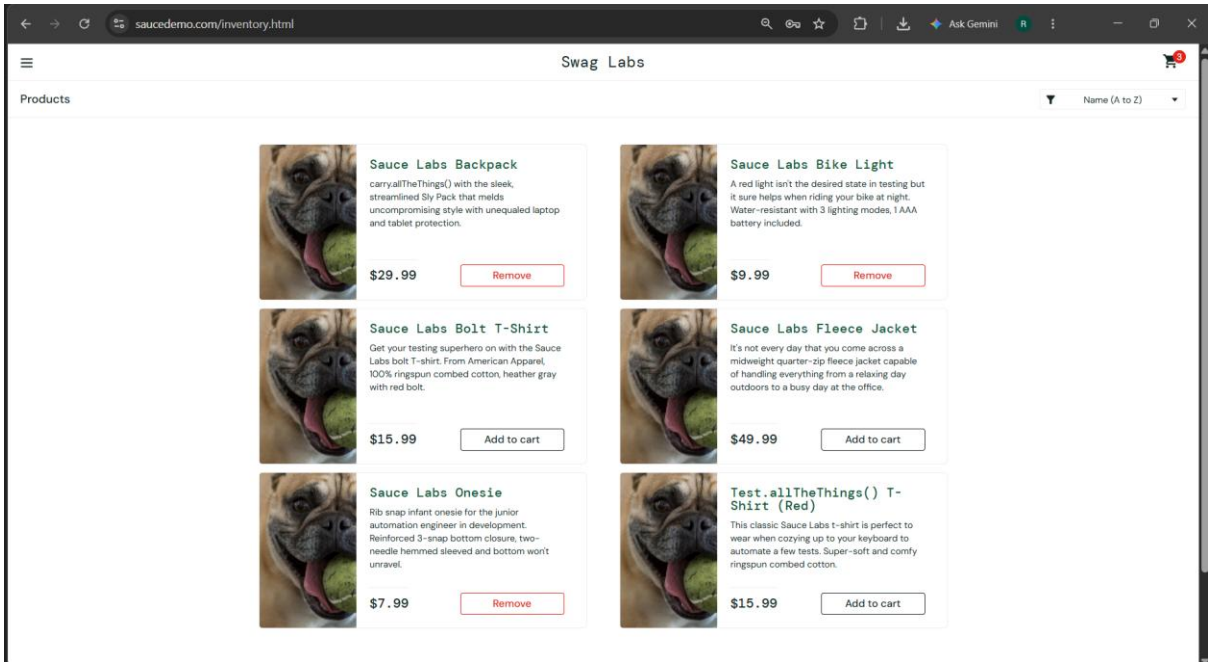

Users may be unable to remove an unwanted product from the cart using the inventory page.

## Notes

The Remove button on the inventory page does not remove the selected item from the cart. But in other accounts it does remove the item.

## Evidence

# BUG-005: Finish button on checkout overview throws a JavaScript TypeError

| | |
|---|---|
| **Account(s) affected** | error_user |
| **Module** | Checkout / Order Completion |
| **Preconditions** | User is logged in as error_user and has reached the checkout overview page with a product in the cart. |
| **Severity** | High |
| **Priority** | High |
| **Reproducibility (e.g. 3 of 3)** | Reproduced. |
| **Status** | Open |

## Steps to Reproduce

Step 1 – Login to error_user account
Step 2 – Add items to cart and proceed to checkout page
Step 3 – Enter only first name and postal code as last name input is disabled for error user and is not required to proceed
Step 4 – The finish button at the end is not responding to place an order

## Expected Result

Order placed successfully and received a pdf receipt

## Actual Result

No order can be placed in error_user account

## Impact

The checkout process fails at order completion, preventing the user from reaching the confirmation page.

## Notes

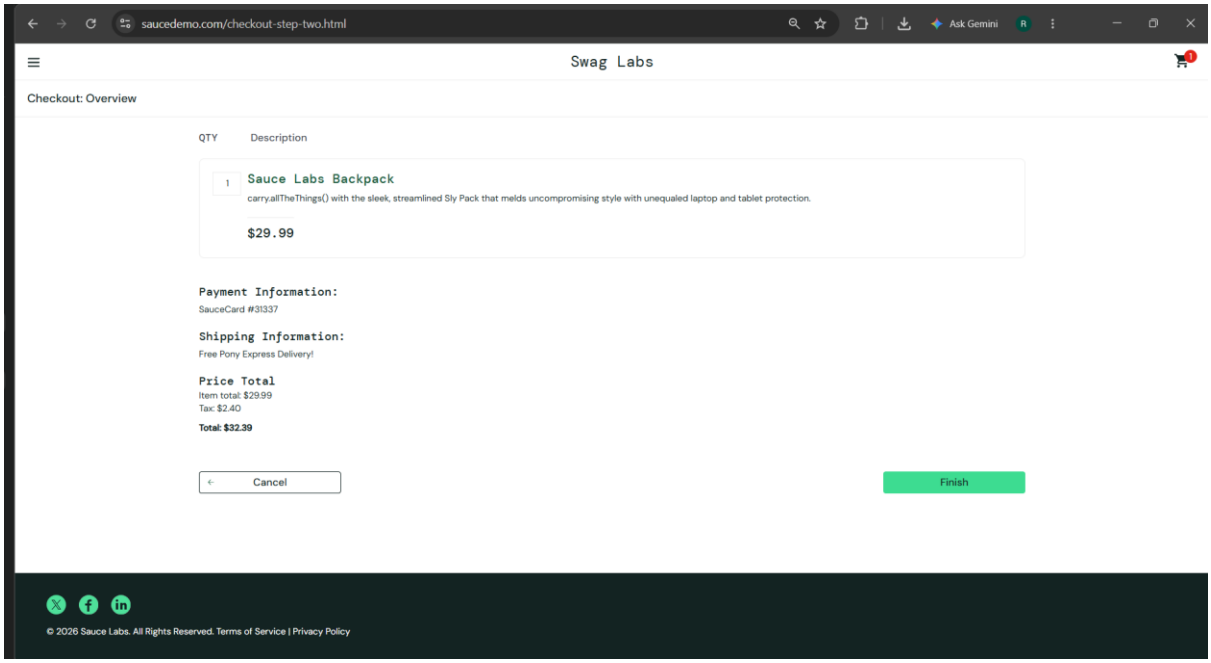

Clicking Finish does not proceed anywhere and user cant place an order

## Screenshots to Capture

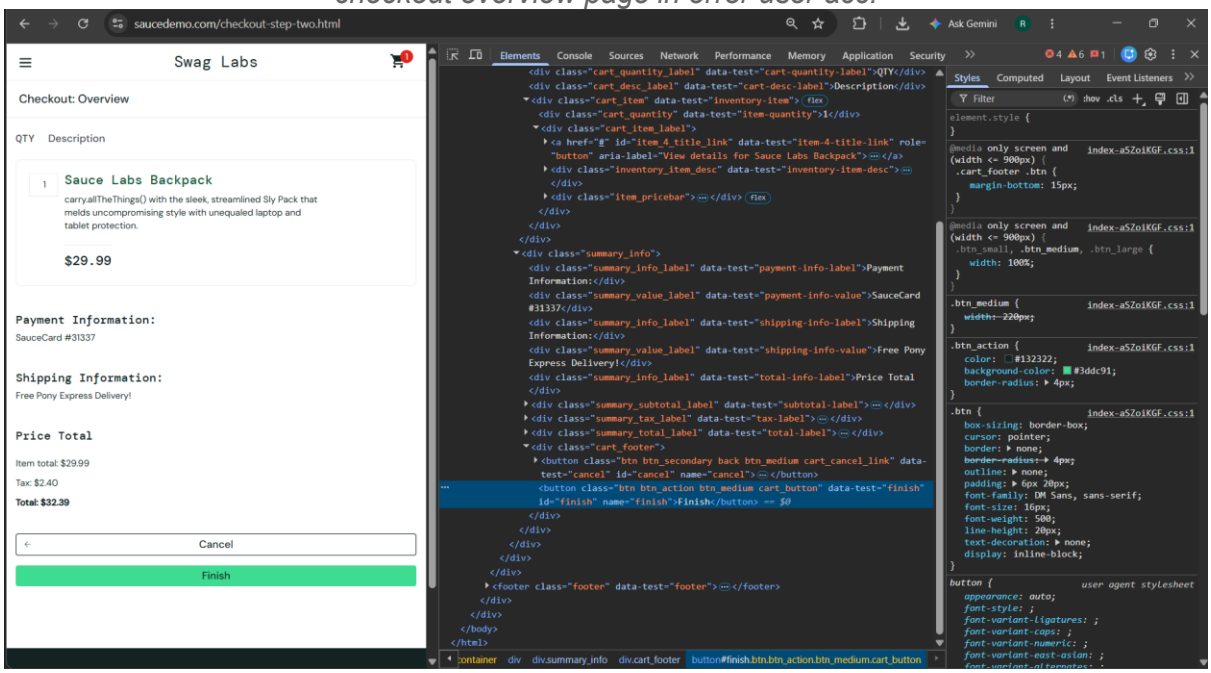

- Checkout overview page just before clicking Finish

- Browser console showing the exact error text after clicking Finish
- Page after clicking Finish, showing no confirmation page
- Optional: short screen recording of the click and the failure

## Evidence

*checkout overview page in error user acc.*

# BUG-006: Last Name field in checkout rejects input

| | |
|---|---|
| **Account(s) affected** | problem_user, error_user |
| **Module** | Checkout / Customer Information |
| **Preconditions** | User is logged in and has opened the checkout information page. |
| **Severity** | High |
| **Priority** | High |
| **Reproducibility (e.g. 3 of 3)** | Reproduced. |
| **Status** | Open |

## Steps to Reproduce

Step 1 – Login to either affected acc
Step 2 – Add items to cart
Step 3 – Proceed to checkout
Step 4 – In problem user it doesn't let you pass unless you enter last name but you cannot enter last name

## Expected Result

All details should be collected properly and input should be accepted

## Actual Result

Last name input is not taken and order is not placed in error user

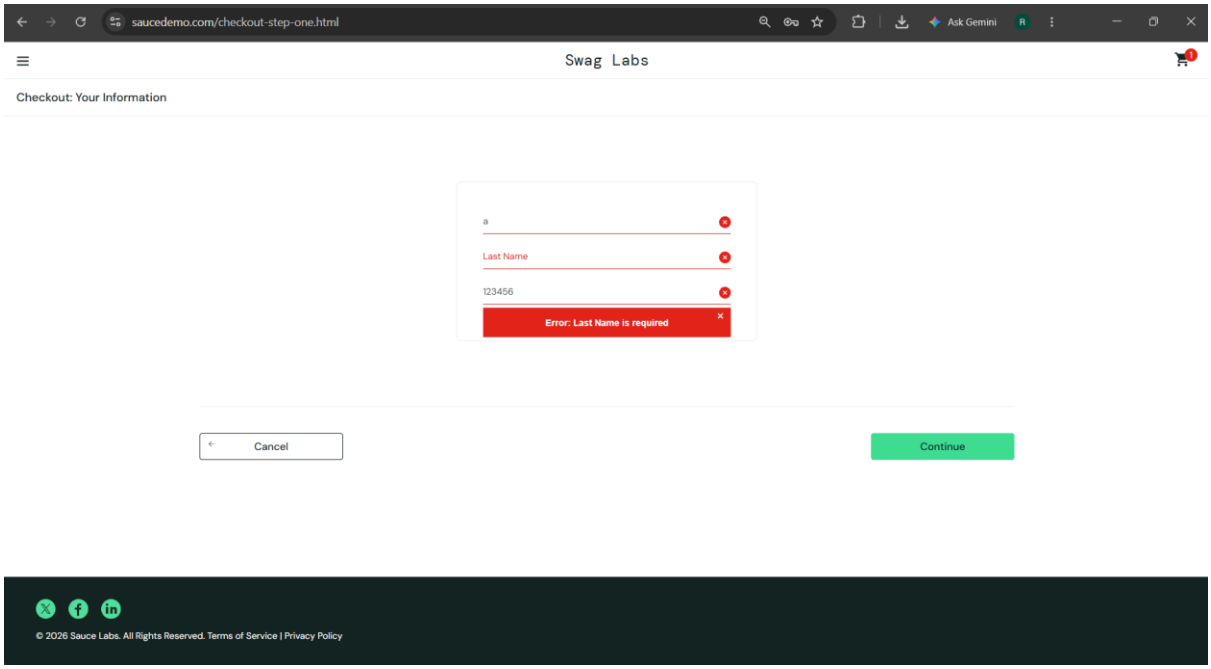

## Impact

Users may be unable to enter the required customer information and continue checkout.

## Notes

The Last Name field rejects input under problem_user. The field behaves differently under error_user.

## Evidence

Trying to place an order but unable to

# BUG-007: Product sorting does not work

| | |
|---|---|
| **Account(s) affected** | error_user, problem_user |

| | |
|---|---|
| **Module** | Product Inventory / Sorting |
| **Preconditions** | User is logged in and the inventory page is open. |
| **Severity** | Medium |
| **Priority** | Medium |
| **Reproducibility (e.g. 3 of 3)** | Reproduced. |
| **Status** | Open |

## Steps to Reproduce

Step 1 – Login to any affected account
Step 2- Use the sort dropdown to sort based on the given sorting order
Step 3 – It shows sorting is broken in error user and does not respond in problem user

## Expected Result

Sorting dropdown should sort the items based on the sorting order user selected

## Actual Result

The function does not sort the products

## Impact

Users may be unable to sort products by their selected option.

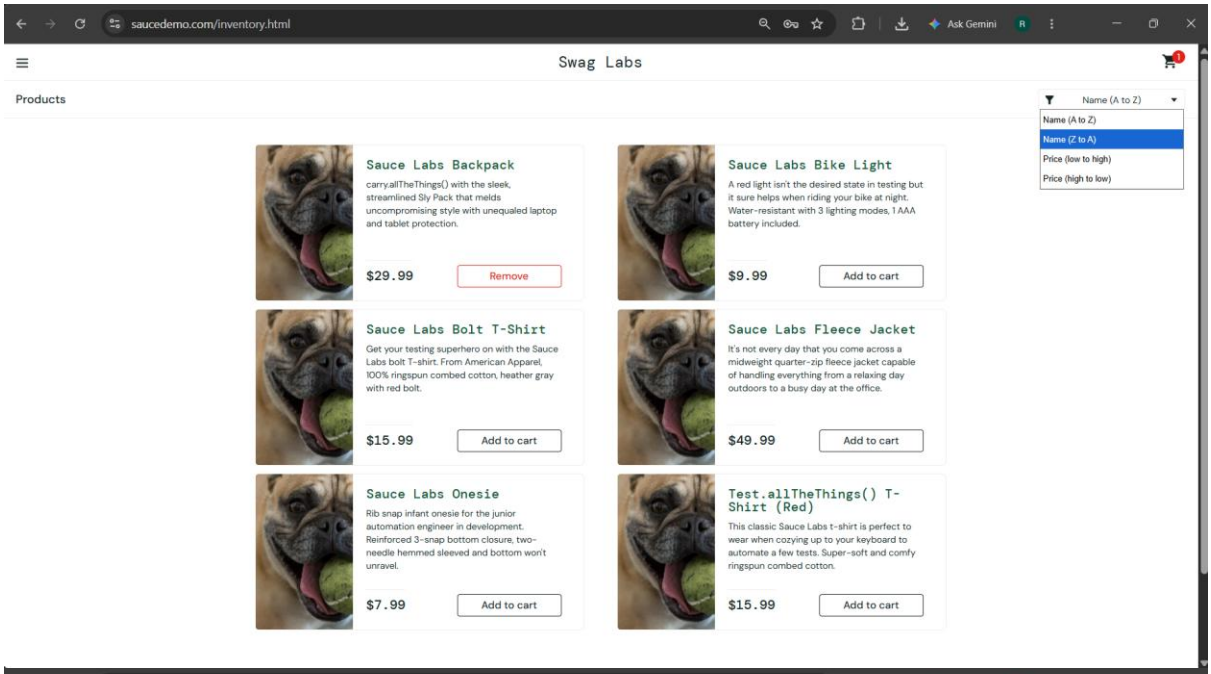

## Notes

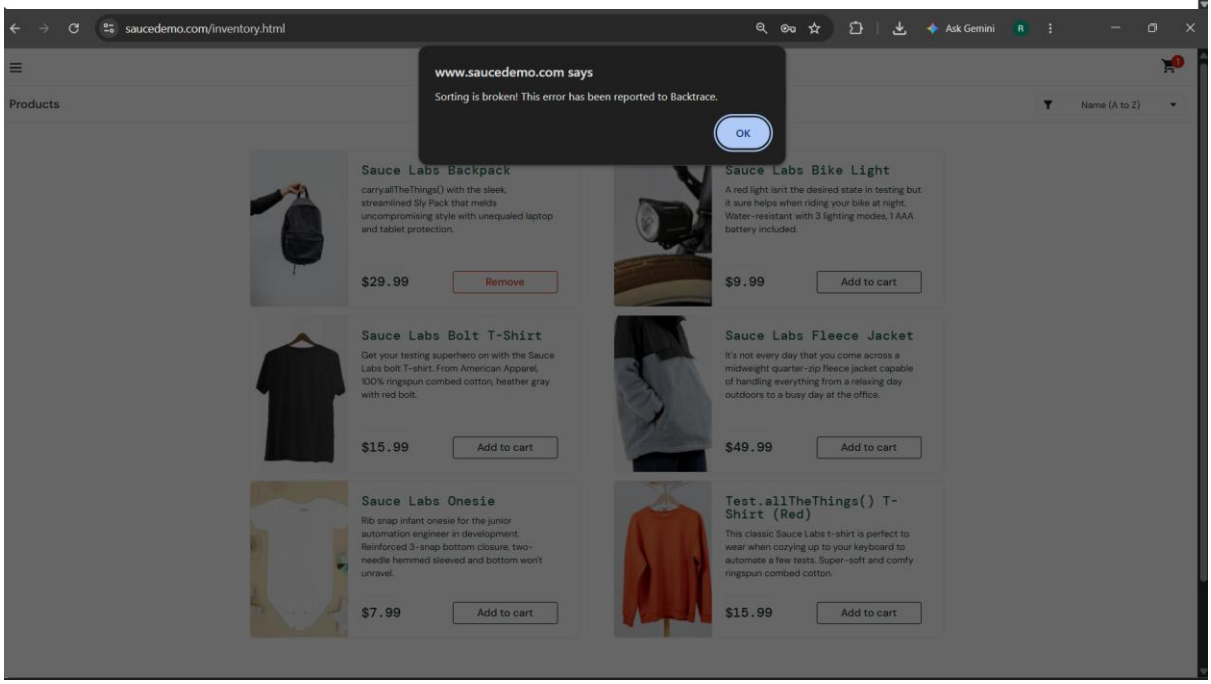

An alert appears under error_user. Sorting also behaves unexpectedly under problem_user.

## Screenshots to Capture

- error_user: the alert message with the URL visible
- Product order after clicking OK, with the dropdown value visible
- problem_user: product order after selecting each of the four sort options
- Control: standard_user sorting working

## Evidence

# BUG-008: Same dog image shown for every product

| | |
|---|---|
| **Account(s) affected** | problem_user |
| **Module** | Product Inventory / UI |
| **Preconditions** | User is logged in and the inventory page is open. |
| **Severity** | Medium |
| **Priority** | Medium |
| **Reproducibility (e.g. 3 of 3)** | Reproduced. |
| **Status** | Open |

## Steps to Reproduce

Step 1 – Login to problem user acc
Step 2 – You will see all the item images are dogs itself

## Expected Result

Each item should have an image based on description of the product

## Actual Result

All items have the same product image which is a dog

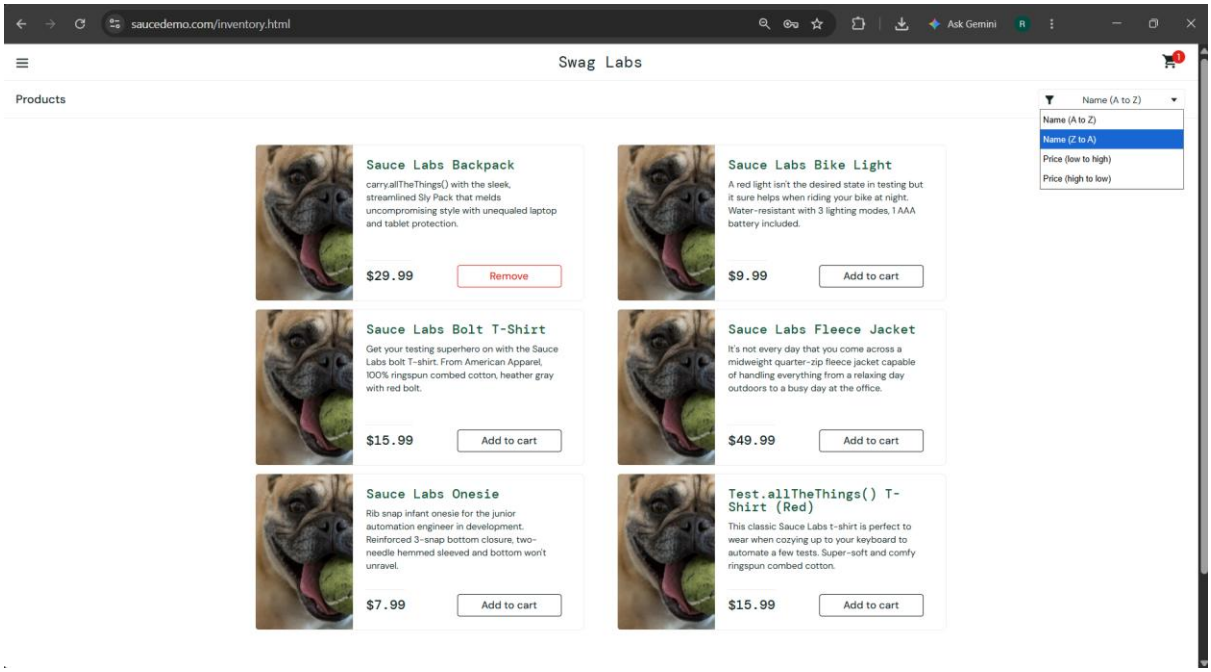

## Impact

Incorrect product images make it harder for users to identify products before adding them to the cart.

## Notes

The same dog image is displayed for multiple products under problem_user.

## Evidence

# BUG-009: Login and page loads are much slower

| | |
|---|---|
| **Account(s) affected** | performance_glitch_user |
| **Module** | Login / Application Performance |
| **Preconditions** | The application is accessible and valid login credentials are available. |
| **Severity** | Medium |
| **Priority** | Medium |
| **Reproducibility (e.g. 3 of 3)** | 3 of 3 attempts |
| **Status** | Open |

## Steps to Reproduce

Step 1 – Login to performance glitch user acc
Step 2 – Notice how long it take to load to inventory page
Step 3 – Compare the same with standard user acc
Step 4 – Record time for both

## Expected Result

Same login time for both the accounts

## Actual Result

performance_glitch_user took approximately 6–7 seconds to reach the products page after clicking Login in each of the 3 attempts.

With performance_glitch_user, the products page took approximately 6–7 seconds to appear after Login was clicked, delaying access to the products.

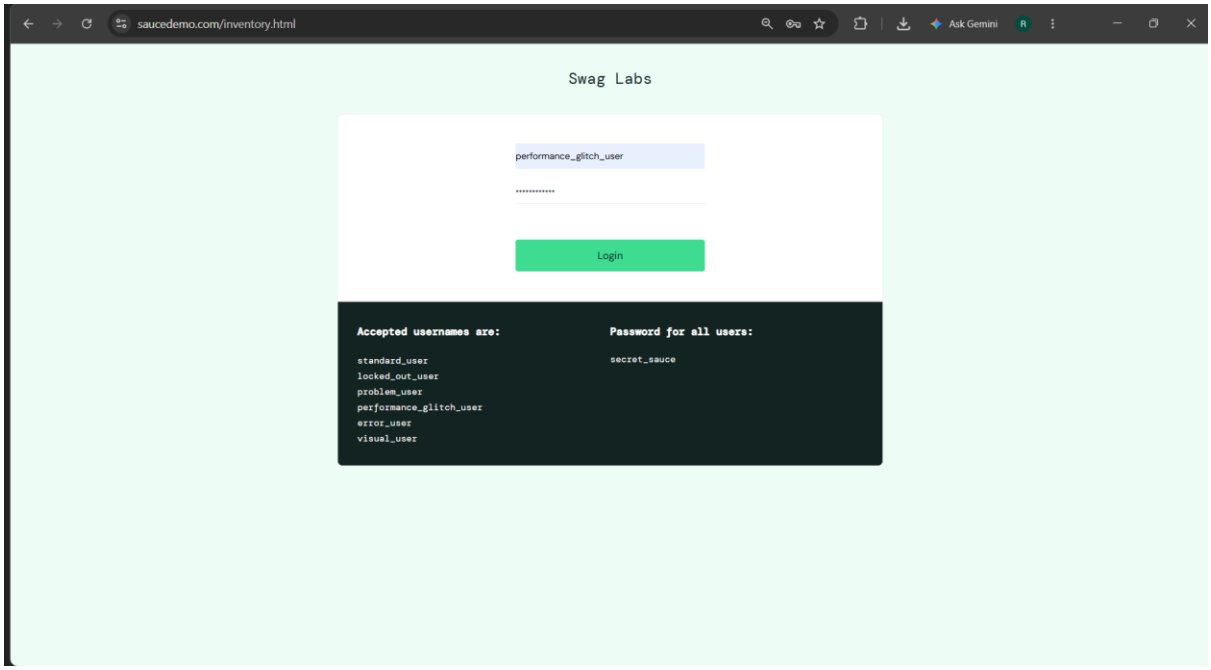

## Notes

performance_glitch_user took approximately 6–7 seconds to reach the products page after clicking Login in all 3 attempts. standard_user reached the products page with no noticeable delay in all 3 runs. The Network tab showed only a few milliseconds for the displayed requests, suggesting the visible delay may occur during page processing or rendering rather than in those network requests.

## Screenshots to Capture

- Clip 1: performance_glitch_user login attempt showing the login page still visible after the URL changes to inventory.html.
- Clip 2: standard_user landing on the products page immediately after login.
- Screenshots captured from both clips showing the difference in the visible page-loading behaviour.

## Evidence

Notice how it shows inventory.html but is still in login page, this is for performance glitch user

# BUG-010: Product prices change on every inventory page reload

| | |
|---|---|
| **Account(s) affected** | visual_user |
| **Module** | Product Inventory / Pricing |
| **Preconditions** | User is logged in as visual_user and the inventory page is open. |
| **Severity** | Medium |
| **Priority** | High |
| **Reproducibility (e.g. 3 of 3)** | Observed repeatedly on page reload; exact count not recorded. |
| **Status** | Open |

## Steps to Reproduce

Step 1 – Log in using visual_user and open the inventory page.
Step 2 – Note the prices displayed for all products.
Step 3 – Reload the inventory page several times and compare the displayed prices after each reload.

## Expected Result

Product prices should remain consistent when the inventory page is reloaded.

## Actual Result

After each reload of the inventory page under visual_user, the displayed prices change across all products.

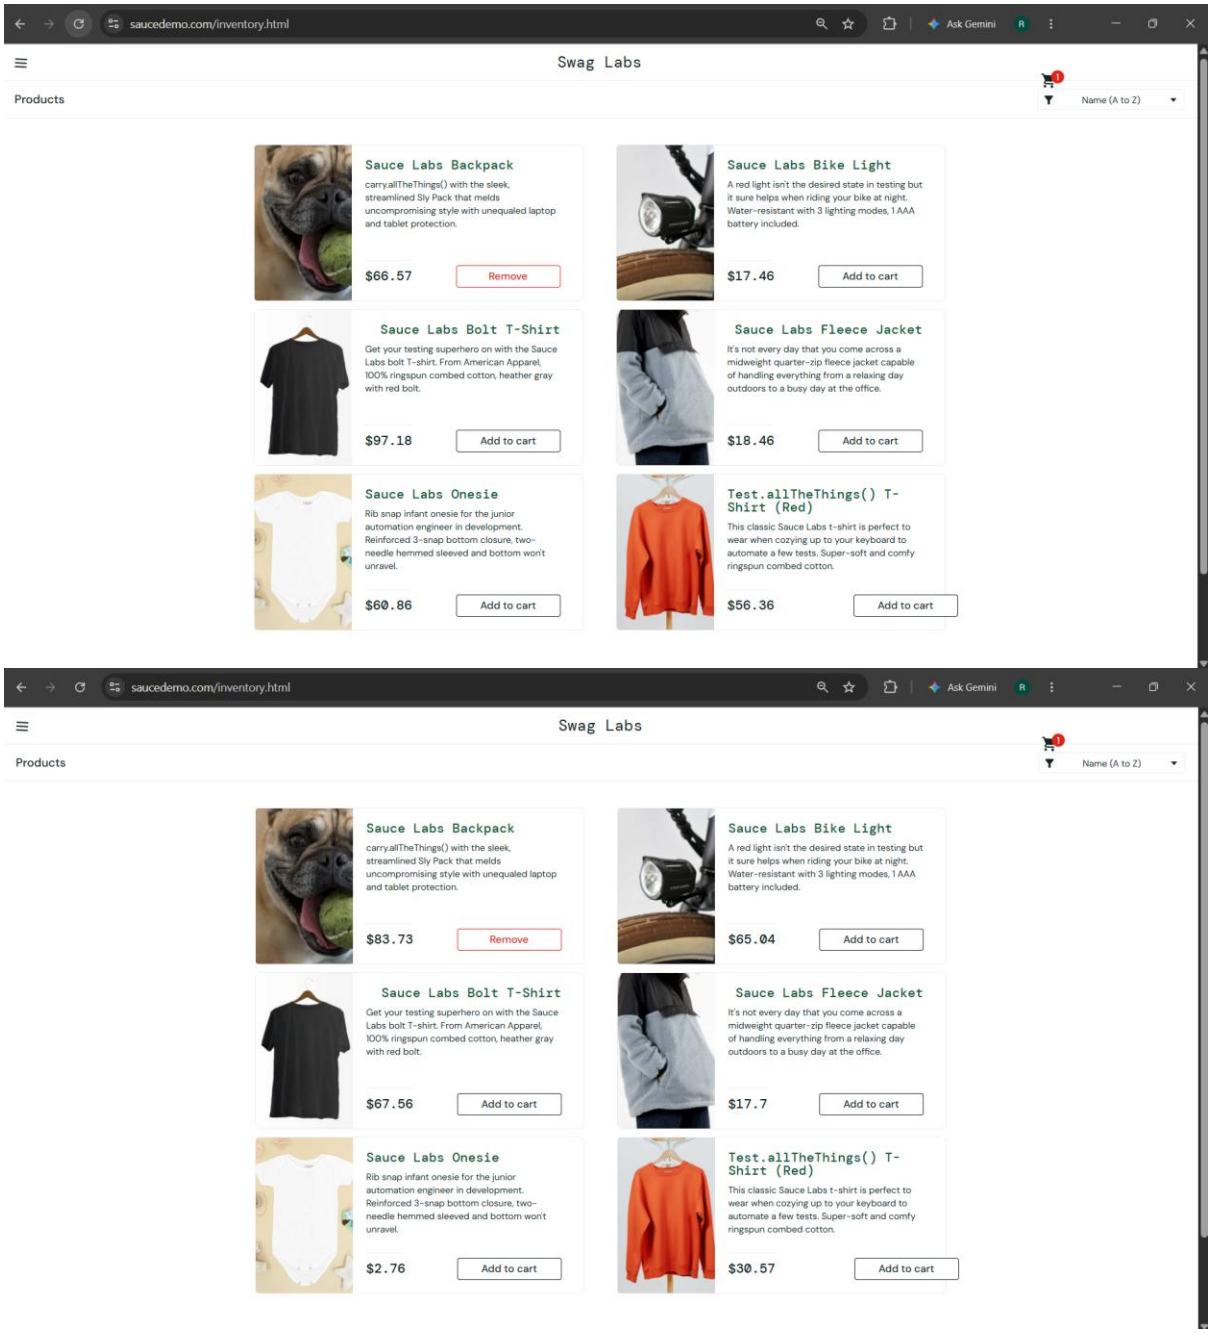

## Impact

Users may see a different price for the same product each time they reload the inventory page, making it difficult to know the correct product price before adding it to the cart.

## Notes

The changing prices affect all products displayed on the inventory page under visual_user. The issue was observed when the page was reloaded; standard_user was used as the control account.

## Evidence

Evidence: inventory page showing product prices changing after repeated reloads under visual_user.

# BUG-011: Misplaced UI elements on inventory and cart pages

| | |
|---|---|
| **Account(s) affected** | visual_user |
| **Module** | Product Inventory / Shopping Cart / UI |
| **Preconditions** | User is logged in as visual_user and can access the inventory and cart pages. |
| **Severity** | Medium |
| **Priority** | Medium |
| **Reproducibility (e.g. 3 of 3)** | Observed during testing; exact count not recorded. |
| **Status** | Open |

## Steps to Reproduce

Step 1 – Log in using visual_user.
Step 2 – Inspect the header and Products row on the inventory page.
Step 3 – Check the Add to Cart button and product title alignment on the inventory cards, especially Test.allTheThings() T-Shirt (Red), Bolt T-Shirt, and Fleece Jacket.
Step 4 – Open the shopping cart and inspect the position of the Checkout button.

## Expected Result

The cart icon and badge should be aligned within the header. The Checkout button should appear below the cart items. Each Add to Cart button should remain within its product card, and product titles should be consistently aligned.

## Actual Result

Under visual_user, the cart icon and its badge appear lower than the header in the Products row. On the cart page, the Checkout button is pushed into the top-right corner near the header instead of appearing below the cart items. The Red T-Shirt Add to Cart button extends beyond the right edge of its product card. The Bolt T-Shirt and Fleece Jacket titles are also shifted compared with the other product titles.

## Impact

The misaligned elements make the inventory and cart pages look broken and inconsistent. The Red T-Shirt button extending outside its card and the Checkout button appearing near the header can make the page harder to navigate and may confuse users.

## Notes

All of these layout issues were observed only under visual_user. They affect the inventory page (cart icon, Red T-Shirt button, Bolt T-Shirt title, and Fleece Jacket title) and the cart page (Checkout button position).

## Evidence

Add screenshots showing the misplaced cart icon and badge, the Checkout button position on the cart page, the Red T-Shirt button extending beyond its card, and the shifted Bolt T-Shirt and Fleece Jacket titles.
